Learn-to-Swim

Swim School at Thoreau

Baby & Me

A Water acclimation and safety program that teaches parents how to work with their child in the water. Pre-swimming skills and techniques are taught to prepare your little one for future group swim lessons and water awareness. Great option for new Moms and Dads!

Level 3

Swimming approximately half the pool length, students will begin to learn new strokes and increase distance. Introduction of streamline position, backstroke, and kneeling dives.

Level 1

A class designed for non-swimmers who are comfortable in the water, but not yet independent. Level 1 focuses on breath control, floating, and forward progression using arms and legs. Must be 3 years old to participate and able to be in a group setting.

Level 4

Level 4 swimmers should be ready to swim 25 yards and will refine proper technique for front crawl, backstroke and breaststroke. Rotary breathing a butterfly are introduced, and swimmers will use equipment such as kick boards and flippers to strengthen arms and legs.

Level 2

A class for children who can swim short distances independently and are ready to learn strokes on their front and back. Level 2 will introduce the fundamentals of the front crawl, kicks, and elementary back stroke.

Level 5

A course focused on perfecting the technique of individual strokes and introducing competitive swimming skills. Students will transition into a coached style class where they will receive feedback on their freestyle, backstroke, breaststroke, and butterfly. Instructors will incorporate racing starts and flip-turns. Level 5 is a great class to prepare for the Thoreau Sharks Swim Team.
